Construction Debris, Garbage Dumpsters, and Material Storage

Construction debris cannot be disposed in normal trash pickup. Dumpsters can be rented from a number of companies providing that service. A good source for these companies is the Yellow Pages.

It is a violation of city ordinances to store building materials including sand, gravel, or dirt on any public right of way. Please advise material suppliers and excavators when ordering materials of the appropriate location for them to deliver building materials.

Please be neighborly. Contain construction debris from blowing into neighboring yards.
